

01 INDUSTRIAL PUMP SOLUTIONS

| rigelepc.com.tr

| rigelepc.com.tr

For industrial facilities, we provide high-efficiency, long-lasting pump systems tailored to specific process requirements.

- Circulation pumps (heating / cooling)
- Pressurization and booster (hydrophore) systems
- Boiler, steam, and condensate pumps
- Process and auxiliary facility pumps
- Fire pumps and pump packages
- Spare parts supply, commissioning, and technical support

A commitment to the right product, the right application,
and uninterrupted operation in fluid systems.

A TRADITION OF TRUST

02 STEAM EQUIPMENT, VALVES AND ACCESSORIES

For industrial facilities, we offer efficient, safe, and process-compliant equipment and valve solutions for steam and condensate lines.

- Control valves and pressure reducing valves
- Ball, globe, butterfly, and gate valves
- Steam traps (mechanical, thermodynamic, thermostatic, float type)
- Heat exchangers (plate type, shell & tube)
- Steam separators and clean steam filters
- Valve groups suitable for steam and condensate lines
- Safety valves, check valves, and auxiliary valve equipment

03 PIPING MATERIALS AND PIPING SOLUTIONS

For industrial facilities, we provide durable, reliable materials and application solutions suitable for mechanical piping systems and process conditions.

- Industrial piping works (fabrication, installation, and on-site applications)
- Fittings and connection components
- Stainless steel fittings
- Carbon steel and stainless steel pipes
- Expansion joints (axial, lateral, hinged)
- Insulation jackets and thermal insulation solutions
- Flexible connectors
- Auxiliary materials for mechanical piping systems

04 WATER TREATMENT SYSTEMS

For industrial facilities, we provide efficient, reliable, and process-compliant solutions for water treatment systems.

- Sales of water treatment systems
- Softening, filtration, and purification systems
- System selection suitable for process requirements
- Solutions for industrial applications
- Systems suitable for new plants and retrofit projects
- Long-lasting and operation-friendly system solutions

Process-specific, controlled, efficient,
and sustainable equipment solutions
for steam systems.

We deliver durability, safety, and continuity
together in industrial
piping systems.

Reliable and sustainable system solutions that enhance
performance in industrial water management.

A TRADITION OF TRUST
